

A MINI PROJECT REPORT
ON
INTERACTIVE DICTIONARY

Submitted to Mumbai University
In the partial fulfillment of the requirement for the award of the degree of

Bachelor of Engineering
In
COMPUTER ENGINEERING
By

Mr. Manzar Shaikh (16CO50)
Mr. Shaikh Azam Ali(17DCO75)
Mr. Hasib Rawal(16CO45)

Under the guidance of
Mr. Aamer Syed Hashmi
Assistant Professor

Department of Computer Engineering Anjuman-I-
Islam Kalsekar Technical Campus Affiliated to
Mumbai University

KHANDA GOAN, NEW PANVEL, NAVI MUMBAI, MAHARASHTRA

2017-2018

**Department of Computer Engineering Anjuman-I-Islam
Kalsekar Technical Campus Affiliated to Mumbai University**
KHANDA GOAN, NEW PANVEL, NAVI MUMBAI, MAHARASHTRA 2017-2018

DECLARATION BY THE CANDIDATE

Shaikh Manzar bearing Roll number: 16CO50, hereby declare that the mini project report entitled “**Interactive Dictionary**”, is a record of bonafide work carried out by me and the results embodied in this project have not been reproduced or copied from any source. The results of this project report have not been submitted to any other University or Institute for the award of any other Degree or Diploma.

Shaikh Manzar
(16CO50)

**Department of Computer Engineering Anjuman-I-Islam
Kalsekar Technical Campus Affiliated to Mumbai University
KHANDA GOAN, NEW PANVEL, NAVI MUMBAI, MAHARASHTRA 2017-2018**

CERTIFICATE

This is to certify that the project report entitled “**Interactive Dictionary**”, submitted by **Mr. Shaikh Manzar** , bearing **Roll. No.: 16CO50** in the partial fulfillment of the requirements for the award of the degree of **Bachelor of Computer Engineering** is a record of bonafide work carried out by him.

Course Owner
(Assit. Prof. Aamer Syed Hashmi)

CHAPTER 1: INTRODUCTION

1.1 Introduction.....	1
1.2 Scope.....	1
1.3 Problem Statement.....	1

CHAPTER 2 SYSTEM SPECIFICATION

2.1 System Requirement.....	2
-----------------------------	---

CHAPTER 3: SYSTEM IMPLEMENTATION

3.1 Modules in the System.....	2
3.2 Code.....	3

CHAPTER 4: RESULTS

4.1 Screen Shots.....	4
-----------------------	---

INTRODUCTION :

The Dictionary software has been developed for all operating system which is most popular.

This is a offline dictionary approach which doesn't need any internet connection. Lots of similar suggestion is also provided if user entered any wrong word.

So basically this dictionary is a offline dictionary for every computer users.

Purpose :

The dictionary is developed to solve users vocabulary confusions or problem. Just few clicks and the meaning is known.

Method :

The approach is to use a json file as Database where Every word with its meaning is stored. And retrieve the data according to user need.

• SCOPE :

The software target any type of computer users who ever get a word which meaning is not known to him.

• PROBLEM STATEMENT:

Creating a user Dictionary for ease the burdon of user. As he/she might be getting any vocabulary problem he/she can open this application and search for that word.
It should be offline to user. As no one will use the application is the application is online. He can get the meaning by just google it. So why whould he/she will use your application.

SYSTEM REQUIREMENTS:-

**This Dictionary only need a 10MB of Disc space and 512MB of RAM.
And the most Important user should have Python Installed in his/her
Computer.**

MODULE :

1. Only User Entry.

USER Entry:-

Here user has to enter the word he/she search for, if word is correct then it return the meaning of that same. Otherwise it will show some nearest match for that word and ask for is that word are you trying to search

CODE:

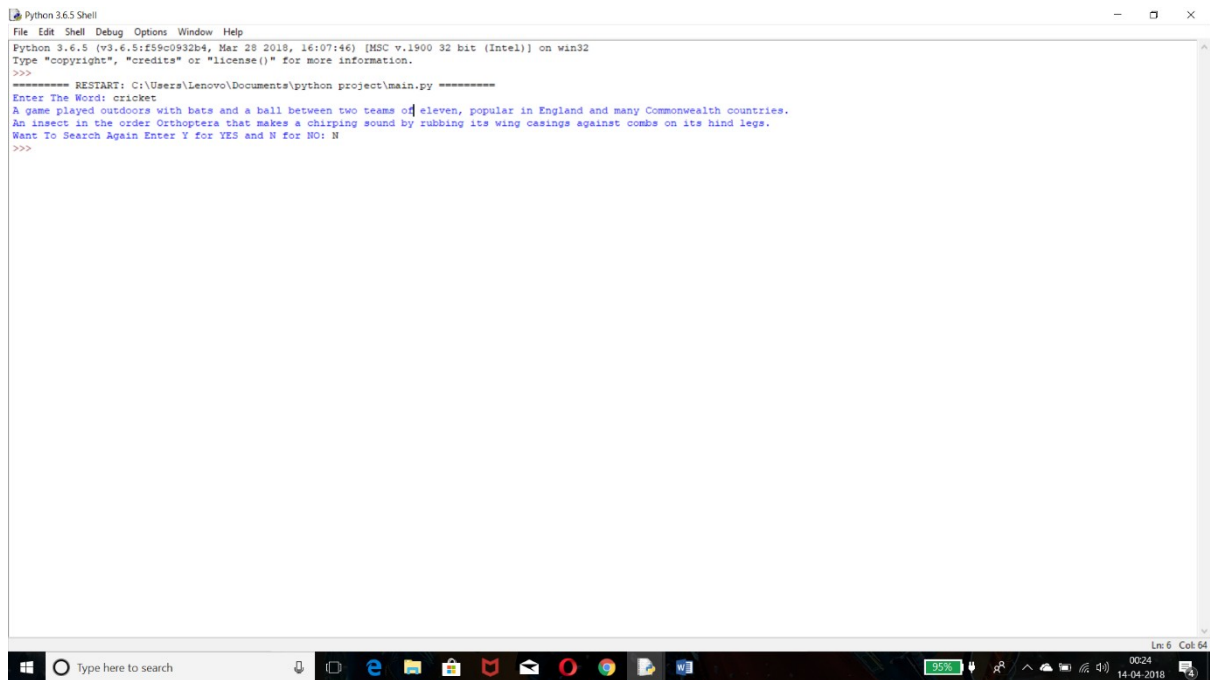

```
import json
from difflib import get_close_matches

data=json.load(open("data.json"))

def check(word):
    word=word.lower()
    if word in data:
        return data[word]
    elif word.title() in data:
        return data[word.title()]
    elif word.upper() in data:
        return data[word.upper()]
    elif len(get_close_matches(word,data.keys()))>0:
        yn=""
        print("Did you mean {} instead Enter Y for YES And N for NO:
        {}".format(get_close_matches(word,data.keys())[0]))
        while(yn != "Y" or yn != "N"):
            yn=input("")
            if (yn=="Y"):
                output=data[get_close_matches(word,data.keys())[0]]
                return output
            elif (yn=="N"):
                output="No Match Found Please Double Check It"
                return output
            else:
                print("We Didn't Understand What You Entered Please ReEnter")
        else:
            return "No Match Found Please Double Check It"
def main():
    exit="Y"
    while(exit == "Y"):
        word=input("Enter The Word: ")
        output=check(word)
        if type(output)==list:
            for i in output:
                print(i)
        else:
            print(output)
        exit=input("Want To Search Again Enter Y for YES and N for NO: ")
main()
```
